Our Greek selections use techniques from many regions around the world at a world-class level. There are few wines as idiosyncratic as the wines of Santorini. It's most famous grape, Assyrtiko, boasts a natural flavor profile very few others possess: bold citrus, a rich salinity, and delicate white flower. The volcanic soils of the island bring a mineral quality to these wines that is singular in essence and astounding in nature. Sleek, bright, mouth-coating and, above all, delicious, there is a wine for every taste from this small but mighty island.

**FEATURED PRODUCER:  
HATZIDAKIS WINERY**

The winery was established in 1997 as a partnership between Haridimos Hatzidakis and his wife Konstantina Chryssou, using Chryssou's family vineyard plots that had been uncultivated since the early 1950s. An artisanal winemaking powerhouse, the Hatzidakis Winery pushed the envelope of experimentation with wild yeast, and was ne of the first to bottle single vineyard Assyrtiko. Haridimos truly cared more about what was in the bottle than anything else. Unfortunately gone far too soon, the tradition is carried on by his daughter, Stella, and an all-female oenology team. Expressive, powerful, and thought-provoking wines, they are some of the most noble expressions of any wine in the world.

Viticulture and winemaking on the island of Crete have a long, storied history. The Minoan civilization was one of the first cultural centers to have a true “wine scene,” dating back to 3000 B.C. Today, Crete is exploring a viticultural renaissance, championing its native grapes with exciting, modern winemaking techniques. Vidiano—viscous in nature, ripe with tropical fruits and an herbaceous finish—is a perfect complement to meat and fish alike.

**FEATURED CRETE WHITE:  
MAHLIHIN-CHRYSSOS “OLD VINES”**

At the ripe age of 24, Iliana Mahilin made discoveries that shook the Greek wine world: she managed to isolate the indigenous yeast on Vidiano grapes and was able to make wine utilizing them. Story has it that she walked from door to door asking older generations of winemakers if they had any old vines of Vidiano that she could begin to farm. Cultivated organically and fermented with natural yeast, the wine is explosive in aroma, fascinating in flavor profile, and will provide one of the more unique drinking experiences that one can hope to have.

Little known secret: the white wines of Macedonia provide some of the most exciting value in the country. The region rose to prominence as it resuscitated and vinified the native Malagousia, richer in texture and steely in fruit, catapulting it into the spotlight. Now modern winemakers are using blends of native Greek varieties with international ones to create expressive, interesting wines of depth and character.

The Peloponnesian peninsula provides the most ideal climate for viticulture in Greece, filled with rolling hills and peaks, flanked by mountain ranges, the Corinthian Gulf, Ionian, and Mediterranean seas. Moscofilero, the native pink-skinned grape, noted for its explosive aromatic quality, unctuous fruit set with a potent dill finish, has made a name for itself by being just downright delicious. Pair with a variety of seafoods and herbed dishes, Moscofilero will capture the senses and delight the palate.

With a history so deeply rooted in viticulture, it would be impossible to distill all of Greece into the regions highlighted on the previous pages. These are some of our favorite white wines from other areas of Greece: from the foothills of Mount Olympus, to the mountainous and rocky terrain of the island of Cephalonia, to the sunbathed plains of Attica, and beyond.

<b>236: ZAFEIRAKIS “NATURA”</b> Malagouzia - Tyrnavos 2017	65

## FEATURED GREEK WHITE: SCLAVOS “VINO DI SASSO”

Evridiadis Sclavos was one of the first winemakers in Greece to convert his whole estate to biodynamic cultivation - not to mention the fact that most of his vines are over 80-years-old! The name of the wine comes from the Venetian's world for Cephalonia's native grape, Robola, where it is grown almost entirely on rocks and stones. Unfiltered, unfinned, and full of character, the wine bursts with texture and salinity.

There is no denying how special the red wines from Macedonia are. Its native grape, Xinomavro, inspires similarities to that of Italy's legendary Barolo: elevated in acidity, bright, dried red fruit, and an intoxicating undertone of savory herbs.

These wines are made in a variety of styles in the range of terroirs in Macedonia: lighter and fruity, dense and bold, deep and rich. They continue to develop and astound with age and are a singular drinking experience. A word to the wise: Xinomavros and any of our lamb dishes are a match made in heaven.

# SKOURAS REDS

The name “George Skouras” is synonymous with “Greek wine.” A Burgundian-educated winemaker, he took the wine world by storm in 1986 with his flagship label: “Megas Oenos,” a blend of the native Agiorgitiko with Cabernet Sauvignon aged in new French oak barrels. His wines evoke grace, beauty, and brilliance—luscious, sensual reds, packed with fruit, finesse, power, and depth. With vision rivaled by few winemakers around the world, Skouras is a true pioneer in viticulture and deserves recognition for his championing of native Greek varietals.

# PELOPONNESSE RED

It is truly fitting that Agiorgitiko, arguably Greece's most intense native variety, finds its home in the same region as the mighty city-state of Sparta. Its throne is in the appellation of Nemea, perfectly positioned at high elevations to guarantee full ripening. Ripe in fruit, lifted in acidity, and round on the palate, there is truly an Agiorgitiko out there for every kind of drinker: they have finesse matched with an approachability that is not commonly found anywhere in the world. Beautifully perfumed and refreshing to drink, enjoy with everything from seafood to meat.

## FEATURED PELOPONNESSE RED: MERCOURI ESTATE RED BLEND

The estate dates back to the 1870s, when the Mercouris immigrated from Italy to Greece - the family has ties to the Venetian trade era. They had brought clippings of the native Italian varietal, Refosco, to plant in Greece. The grape is now widely referred to as “Mercoureiko,” or the Mercouri Clone. One of the most beautiful wineries to be constructed, and some of the most elegant wines produced on the Peloponnesse, the family's history is not to be missed.

Thessaly is the largest single site of highly productive soil in Greece, referred to as O Kambos: “The Plain.” Located between Mount Olympus, the Pindos Mountain range, and Mount Othris, it is arguably Greece's best kept secret of wine production. Limniona, a grape brought back from the edge of extinction, has captured the attention of wine enthusiasts around the globe. The wines of Thessaly have bright, fresh red fruit flavors and wonderful herbal finishes.
